The National Psoriasis Foundation (NPF) is seeking grant applications that encourage the advancement of innovative research into psoriasis and psoriatic arthritis. Translational Research Grants fund research initiatives that focus on the rapid translation of basic scientific discoveries into clinical applications with a clear benefit for patients with psoriatic disease.

Applications related to all aspects of psoriatic disease are strongly encouraged, including basic science, translational research, technology, epidemiology, health services, and clinical research. Prospective applicants are encouraged to review recent publications and reports identifying research gaps and priorities in psoriatic disease research.

I. **Budget:** Applicants may request up to $100,000 (direct costs only) per year.

II. **Project Period:** The project period for this Request for Applications is **two years**, from August 1, 2021 – July 31, 2023. Second year funds are contingent upon adequate progress through the first year.

III. **Eligibility:** The principal investigator must be personally and actively responsible for the conduct of the proposed research, hold an M.D., Ph.D., or equivalent academic degree, and be eligible to apply as a Principal Investigator by their institution. The principal investigator need not be a United States citizen and the research need not take place in the United States.

IV. **Important Dates:** Applications must be received by **WEDNESDAY, JAN. 13, 2021 at 5 P.M. PST.** Award notifications are anticipated by **JUNE 30, 2021.**

IV. **Application Information:** Translational Research Grant applications require a project proposal that includes specific aims, background and significance, preliminary data, and experimental design. The application along with all related forms can be found at [https://www.psoriasis.org/translational-research-grants/](https://www.psoriasis.org/translational-research-grants/).

Psoriatic disease doesn’t discriminate. The NPF advocates for improved access to care and meaningful access to treatments. We support research and clinical trials focused on addressing health disparities and treating BIPOC. Applications should take into consideration representation of diverse population in all aspects of research, study team, and study participants/enrollees.
